Members of the public were given the opportunity to voice their opinion for/against.

This was followed by a community council meeting when it was agreed to forward the following observations to the Planning Department.

- Recognise importance of the poultry and eggs industry to the local economy, also the need for farms to diversify in order to be sustainable.

However:-

There appears to be questions about the suitability of the site due to ecological and environmental impact.

We would urge the Planning Committee to pay close attention to expert advice in these areas.

For example:- nitrogen deposition should be clarified (19.46 kg N/ha/yr) which seems to be above the critical load of (10.0 kg N/ha/yr).

We feel that adequate passing places should be made available on the lane running from Dalfallen bridge to the site.

After further discussion the community council agreed to support this application.

The chairman thanked everyone for attendance and declared the meeting closed at 9.30 pm.

Signed:
